Mail from Fritz - 8/31/00

- Over the last year the controls group has loaned PPC processors from the Run II inventory to the various detector groups. Over the next month, these processors must be returned for installation in the MCH. The following table shows where these processors are located. If your name appears in the "Responsible" column, you must arrange with the detector group to retrieve the processor.

What I need

- Who is purchasing CPU's?

- How many?

- Budget Code?

- Other information?
